

Bassett Healthcare Network
Bassett Medical Center

Pathology Conferences:

Tumor/Breast Conference Every Wednesday 4:30 – 5:30 Clark Auditorium/zoom

This conference is for the purpose of patient management, teaching and education as the pathologists work in conjunction with the various physicians who compose the conference memberships.

Requests for cases to be reviewed should be submitted **two(2)** calendar days prior the conference. Cases requested less than 48 hours before the conference may not be available for presentation. Pathologists need time to gather, review and prepare the case information to address questions. If a clinician would like a case to be presented past the 48 hour time frame, the clinician must call the pathologist who is on Tumor Board for the week for permission. If a clinician has a specific question about a case, include that with the request.
